

New Dometic 8900 Series Macerating Toilets

THE LOOK OF LUXURY... WITH THE LUXURY OF EASY CHOICE

BIG PRAIRIE, OHIO, USA – SEPT 2008 – One luxurious look. Many practical options. That summarizes the distinct advantage of Dometic’s new 8900 series of toilets powered by MasterFlush™ technology.

Dometic 8900 series toilets provide an abundance of features to satisfy diverse owner preferences and meet virtually any boat-builder requirement. Dometic 8900 series MasterFlush toilets are available in standard residential and low-profile heights; with through-the-floor or through-the-wall discharge options; and in 12 V DC or 24 V DC operation versions. The contemporary shape of 8900 series MasterFlush toilets features a compact footprint to fit in most any head compartment.

Discriminating owners may choose from additional options: toilet or toilet/bidet combination unit; standard hinge or “soft-close” seat; white or bone colors.

Featuring convenient electronic flushing, MasterFlush 8900 toilets can be set for “normal” flushing that adds water to the bowl after every flush, or “rough sea” flushing that does not add water to the bowl. The Dometic touchpad also includes a “power on” indicator light and red “full tank” light that shuts down electrical power to the toilet until the full tank is emptied. Electronic controls are available in a standard Dometic touchpad panel, as well as in popular Vimar and Gewiss switch components.

Dometic 8900 series MasterFlush macerating toilets

(more)

For added boat designer appeal, the ceramic styling of the new 8900 series MasterFlush toilets matches that of Dometic's highly popular 4800 series of VacuFlush® toilets. This advantage allows designers to switch from one toilet flush technology to another, depending on customer preference, without the need to alter bathroom compartment floor plans or appearance.

Dometic Sanitation, formerly SeaLand Technology, is the leading supplier of onboard sewage management systems for premium yachts worldwide. Dometic is the originator of the VacuFlush toilet system and specializes in custom-designed holding tank systems. In 2005, Dometic introduced MasterFlush flushing technology to the marine industry, and it is now well-proven in many thousands of onboard installations.

Dometic Group is a customer-driven, world-leading provider of leisure products for the caravan, motorhome, automotive, truck and marine markets. We supply the industry and aftermarket with a complete range of air conditioners, refrigerators, awnings, cookers, sanitation systems, lighting, mobile power equipment, comfort and safety solutions, windows, doors and other equipment that make leisure life more comfortable away from home.

Dometic Group supplies a wide range of workshop equipment for service and maintenance of built-in air conditioning. Dometic Group also provides specially designed refrigerators for hotel rooms and offices, for transport and storage of medical products, and for storing wine.

Our products are sold in almost 100 countries and are produced mainly in wholly-owned production facilities around the world. The number of employees is 6,000.
